# "Electroflash" Electronics Kit

1015001 \$165.00

for electric experiences in:-

**Science, Physics & Technology.**

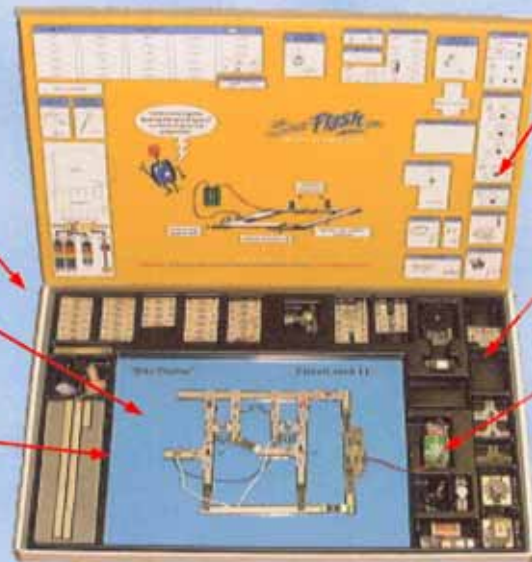

(a proven resource for years 5 to 12 classrooms)

**Inquire today!**

**Inquire For Quantity Discount!**

A superb resource for: investigating circuitry concepts, series and parallel bulbs, switches resistors, incorporating meters to measure circuit values, exploring applied circuits (such as sensors, sirens, LED flashers, musical organs and more). Also invaluable for prototyping circuits.

★ Wide range of premounted, reusable components

★ Innovative click together connection system enables circuits to be built very quickly

★ Templates to build many useful circuits such as;  
*Sensors, siren, musical organ, intercom, LED flashers, quiz boards, Timers, simple radios etc*

★ Attractive layout enables kits to be "checked at a glance"

★ Robust plastic tray to hold components

★ Battery powered for portability & safety

★ Useful learning guide

Develop your Science or Technology electrical programmes around this exciting resource!

### Some teacher comments:

"Kids love using the kits and staff are impressed with the level of student confidence and first time success rate".  
- G. Tinkler (Head of Science, Cashmere H. S.)

"I am using the kits for the first time with new classes and they are a hit with the children. It has been hard to get them to leave the class. Both boys and girls show a lot of interest 'because it's easy to set up and see how things work'. They are easy to check at the end of a lesson and everything so far has remained intact".  
D. Monk (Te Awamutu Middle School)
